

JetCalc light

JetCalc light calculates the optimal match between the nozzle and the truck. Therefore, the nozzle will achieve it's best performance with the truck specifications. You get the JetCalc light version free by downloading it from www.enzusa.com.

JetCalc full version

This JetCalc version calculates the optimal components for our nozzles and figures in the pressure loss. This program is specially for enz golden jet® products. Other nozzle brands can also be calculated with this program.

High Performance Tool  **JetCalc Nozzle Calculation Programm**

Article	400.101A
Pump capacity	
Flow rate	76.0 US-G/min
Pressure	2'500.0 PSI
Hose system	
1. Length = 600.0 Ft (Plastic)	Nominal diameter = 25.0 mm Pressure loss = 657.2 PSI
Calculated values	
Flow rate	72.2 US-G/min
Final pressure	1'842.8 PSI
Pressure loss	657.2 PSI
Traction approx.	113 lbs
Excess	3.8 US-G/min
Assembly	
	A = 3 x 2.1 mm
	B = 2 x 1.5 mm
	S = 6 x 1.8 mm
	Z = 0.0 mm
